Market Environment Update and Outlook

- Second quarter GDP grew at a rate of 4% (according to the advance estimate) after decreasing by 2.1% in the first quarter.
 - Retail sales (ended June) rose to 3.7% on a year-over-year growth rate basis.
 - The inventory-to-sales ratio has remained mostly flat since early 2010 and closed at 1.29 in May.
 - Corporate profits as a percent of GDP fell from secular highs to 11.6% at the end of Q1 2014 but remain elevated relative to historical levels.
 - The U.S. trade deficit decreased in May.
- The unemployment rate fell to 6.1% in June; U-6, a broader measure of unemployment, fell to 12.1% during the second quarter.
- The Case-Schiller Home Price Index (as of 3/31) stayed nearly flat at 150.79 and is only slightly below the highest level (150.92) it has reached since prior to the financial crisis.
- Rolling 12-month CPI increased to 2.1% at the end of May; Capacity Utilization rose slightly to 79.1% in May.
- Fed Funds rate remains at 0.25%, while the 10-year Treasury Yield finished June at 2.53%.
- The Fed balance sheet continues to increase in 2014, while European Central Bank balance sheets have decreased.
 - Large economies continue easing (Japan to the extreme), while the ECB cut its main lending rate imposing a negative excess deposit rate.
- S&P valuations rose in June remaining above the 10-year and long-term averages, which are nearly equal at 16.4x, using current price/earnings ratios.
 - Cyclically adjusted Shiller PE ratios, are well above the long-term average of 17.6x and above the 10-year average of 23.0x.
 - VIX continues to remain near historically low levels.

Second Quarter 2014 Market Review

<u>Positives</u>

- Early stages of Taper generally accepted by marketplace
 - Though priced in, "normalization" of rates appears optimistic given dovish Fed comments
- Q2 GDP growth estimated at 4%
 - U.S. employment gains have resulted in a positive outlook for consumption
- ECB's move to cut main lending rate and impose a negative excess deposit rate for banks met with tepid investor reaction
- Developed world inflation is low
 - Allows Fed continued flexibility to work through Taper
- Emerging markets made further progress
 - Positive flows, expectations for global growth and valuations may provide tailwind
- Volatility remains subdued and markets relatively stable

Negatives

- Potential geopolitical instability
 - Instability in Iraq, Israel and Ukraine could have spillover effects away from oil price shocks
- Benign market environment in Europe obscures challenging underlying economic conditions
- Inflation experienced an uptick
 - Supply disruptions contributed to food and energy price increases
- Chinese economic stimulus aided Q2 results but China still lagged broader emerging markets
- Valuations beginning to stretch above long-term averages
 - Developed Equity P/Es above median
 - Credit spreads near historically low levels

Global Equity

- U.S. equities advanced in the second quarter amid improving economic data underscoring growth in the United States and Europe.
- Large cap stocks outperformed small cap stocks during the quarter, with the S&P 500 Index returning 5.2% versus 2.1% for the Russell 2000 Index.
- International equities slightly underperformed U.S. markets during the quarter, returning 5.0%, as measured by the MSCI ACWI ex-U.S. Index.
 - Developed markets returned 4.1% as measured by the MSCI EAFE Index. Within developed markets, Japan was one of the better performing regions, returning roughly 6.6% during the quarter amid positive remarks on structural reform from Prime Minister Abe.
 - Emerging markets returned 6.6% as measured by the MSCI Emerging Markets Index. Returns during the quarter were bolstered by improving conditions in the Ukraine (conditions have since deteriorated), positive election results in India, and better economic conditions in China. Turkey and India were the best performing markets, returning 15% and 13%, respectively.

Private Equity

- New private equity commitments totaled \$92.1 billion in Q2 2014, bringing total new commitments to \$173.1 billion in the first half of the year. 2014 is on track to be the fifth straight year of increasing commitments.
 - While the overall trend was up, commitments to North American private equity funds fell 3% in the first half of the year. The relative value of European and Asian private equity may be outweighing the risks of investing overseas.
- Buyout and growth equity funds have raised \$88.5 billion through the first half of the year, with mega buyout firms accounting for 31% of all buyout/growth equity funds.
- Venture capital commitments were \$27.2 billion in the first six months of the year, nearly matching the total raised in all of 2013.
 - At 16% of total private equity raised, commitments are just below the 10-year historic relative average.
- Mezzanine funds continue to face strong headwinds from a robust high yield market and an expanding supply of private debt.
- Asian private equity commitments accelerated in 2014 to \$21.7 billion.
 - Represents 13% of 2014 total across all geographies and 72% of all Asian PE funds raised in 2013.
 - Approximately three-fourths of Asia PE raised in the 1st half of 2014 was by China funds.

Fixed Income

- Bond markets continued their rally from the first quarter as strong performance in Treasuries spurred a rally across fixed income sectors.
- The 10-year Treasury yield fell almost 20 basis points during the quarter, finishing at 2.53%.
- The Treasury yield curve flattened as two-year yields rose slightly to 0.47% from 0.44%.
- Treasury Inflation-Protected Securities, or TIPS, outperformed nominal Treasuries due to increased inflation (expectations and actual), with the Barclays US TIPS Index posting gains of 3.8% during the quarter.
- Despite record new supply, investment grade credit posted strong performance, with spreads narrowing seven basis points to 96 basis points.
 - The U.S. Credit Index gained 2.7% and the Long Duration Credit Index returned 5.0% in the second quarter.
- High yield bonds returned 2.4%, aided by a decline in Treasury yields and a tightening of credit spreads.
 - Spreads on high yield credit declined to 337 basis points, a post-crisis low, from 358 basis points at the end of the first quarter.
- Additional monetary accommodation implemented by the ECB helped to extend a rally in emerging markets debt.
 - Local currency (JP Morgan GBI-EM Global Diversified Unhedged) and external currency (JP Morgan EMBI+) emerging markets debt had a stellar second quarter, returning 4.0% and 5.8%, respectively.

Commodities

- Commodities posted modest gains in the second quarter with the DJ UBS essentially flat while the GSCI returned 2.7%.
 - Commodity prices experienced high variability among sub-sectors.
- Further tensions in the Middle East pushed energy prices higher while record low livestock inventories in the U.S. caused cattle prices to spike.
- Poor weather conditions in the growing regions, combined with severe cold weather, sparked supply related rallies
 earlier in the quarter in corn and natural gas before reversing course and trading downward during the second half
 of the quarter.

Real Estate

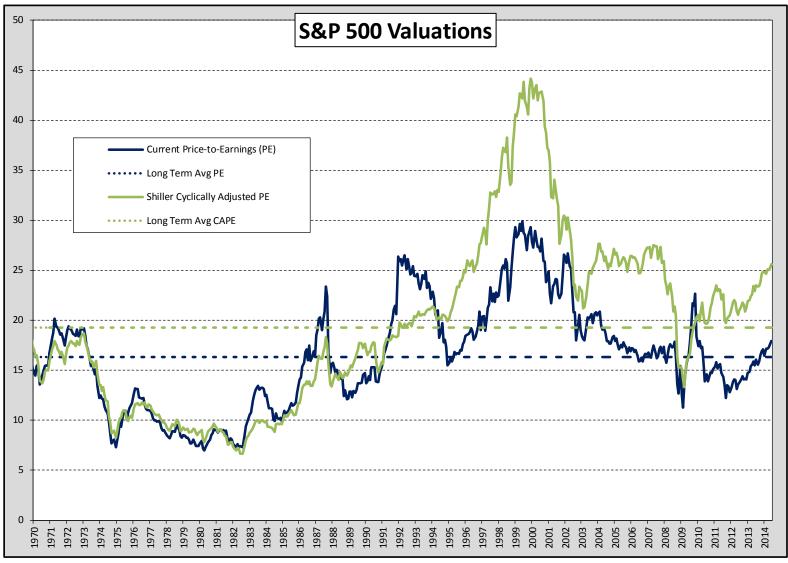

- NEPC continues to be neutral on core real estate in the U.S. and remains positive on non-core real estate, that is, value-add and opportunistic strategies, particularly in Europe.
- Within U.S. core real estate, strong fundamentals continue to be the story along with attractive income spreads relative to interest rates.
 - The concerns for U.S. core real estate (and U.S. real estate, broadly) continues to be plentiful capital that is driving up pricing; and the market's expectation for higher future interest rates and their impact on capitalization rates and capital values.
- U.S. REITs have rebounded in 2014 following weak performance in 2013.
 - 16.2% compounded return through Q2 versus 2.9% annual return in 2013 and 2.3% 20-year average annual return.
 - REITs are trading at slight premiums to NAV with high FFO multiples; indicative of higher public market growth expectations.
- Overall, the non-core real estate investment environment in the U.S. is normalizing; however, select areas remain attractive.
 - Non-major markets have been slower to rebound relative to major markets and select property types/geographies remain distressed.
- Europe is viewed as the best place for a marginal dollar of non-core real estate investment.
 - Europe is emerging from multi-year recession, but recovery is slow.
 - Banks in EU are still overleveraged and have significant real estate exposure (banks in Europe hold 90%+ of real estate debt or €2,300B; in the U.S. banks hold 49% of real estate debt).

Real Assets/Inflation-Linked Assets

- NEPC believes that energy, specifically in North America, represents an attractive opportunity in the upstream and mid-stream parts of the energy value chain.
- Agriculture and metals/mining opportunities seem appealing based on long-term demographic trends despite a less certain short-term outlook.
 - NEPC believes in long-term demand drivers for agriculture, especially for row crops such as corn and soy.
- Timber is an area of portfolios where we would recommend underweight positions as total return targets are low with a relatively small market opportunity and managers seeking deals outside the U.S.

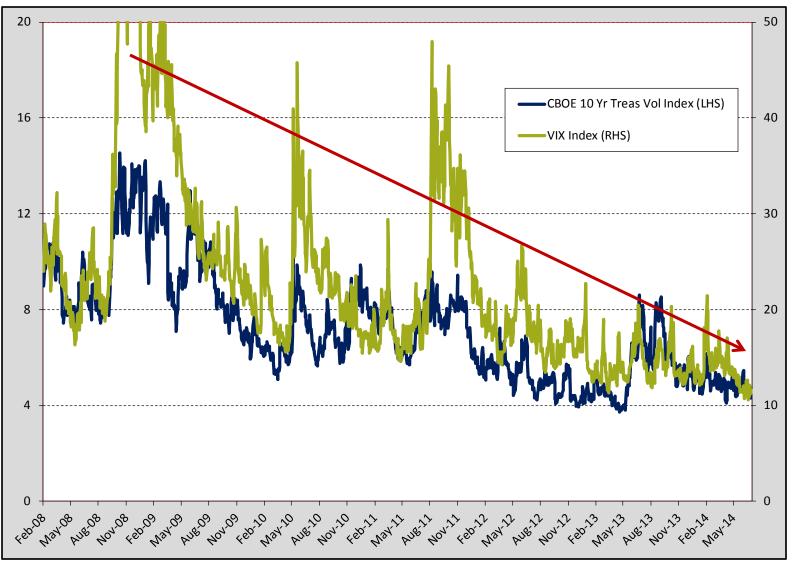

Equity Valuations are Trending above Long-Term Averages

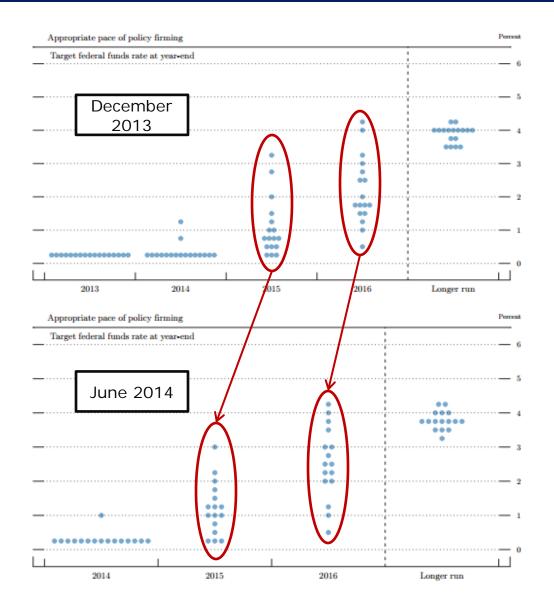

Source: Bloomberg as of 6/30, Long-term averages since 1954

Amid a Backdrop of Persistent Low Volatility

Source: Bloomberg as of 6/30

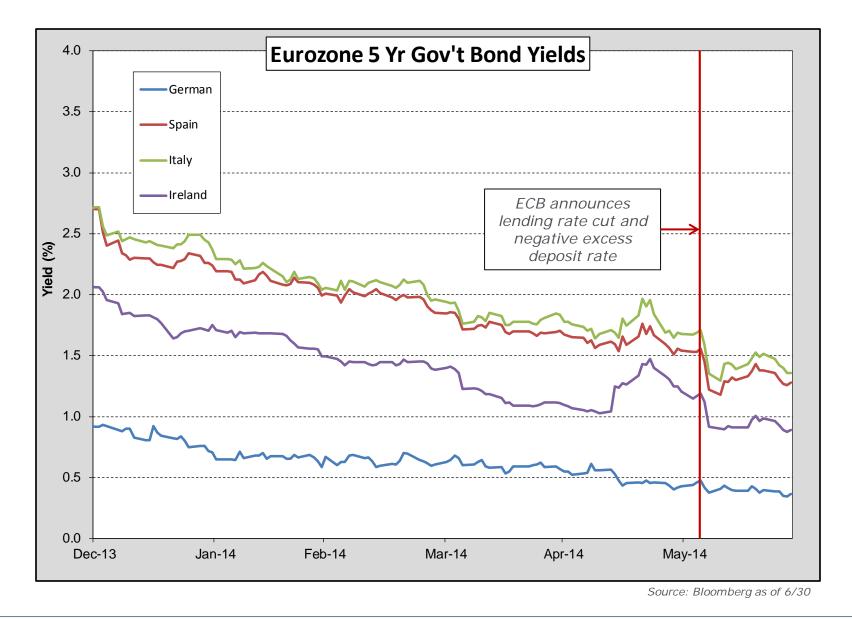

Uncertainty Regarding the Pace of Fed Policy Firming Remains

- Fed has delivered relatively unified messages on the pace of taper and thoughts on U.S. economy
- However, significant uncertainty remains on pace of raising the target Fed funds rate
- Though markets expect rates to rise, pace and path are unclear

Each shaded circle represents the value (rounded to the nearest ¼ percentage point) of an individual participant's judgment of the appropriate level of target federal funds rate at the end of the specified year or over the long run

Source: Federal Reserve

- Interpreting and understanding the low volatility environment is a key challenge.
 - Low volatility can persist for long periods as a tailwind to markets but can also lead to complacency as excesses build in capital markets.
 - Assess portfolio risk exposure and determine reasonable levels of portfolio liquidity and dry powder for future opportunities.

• Persistent low volatility may obscure underlying economic risks.

- Global growth expectations remain subdued.
- EM balance of payment concerns remain as some countries slow the pace of reforms.
- China growth softens as credit growth continues to expand.
- Geopolitical risks pushing oil prices higher.
- As taper of QE concludes, there is the potential for increased volatility as markets seek visibility into the Fed's monetary policy for 2015.
- Valuations across many asset classes appear stretched.
 - Excluding EM, equity P-E ratios are above long-term averages.
 - Credit spreads continue to tighten globally from insatiable demand.

• NEPC themes remain consistent.

- Investors would be wise to rebalance to policy targets and maintain portfolio risk balance.
- Allocate to emerging markets and private markets for higher returns in a low return world.
- Look for opportunities to be dynamic particularly in credit markets.

News from NEPC

• NEPC is pleased to announce the selection of MSCI's BarraOne and HedgePlatform for risk management and reporting. "This broader relationship with MSCI will provide NEPC with leading risk tools for both total plan risk and hedge fund risk. We are particularly excited about the plans to integrate the InvestorForce Reporting platform with BarraOne," noted Dan Kelly, Chief Operating Officer of NEPC.

Professional Staff Updates

New Client Strategy Team

- Provides high level Research and Consulting Services to all practice areas and develops sophisticated client Research. The team offers a centralized senior level resource pool for all clients that require expertise in asset allocation, defined contribution and alternative assets.
- Led by Chris Levell, ASA, CFA, CAIA, Partner focusing on asset allocation
- Supported by Ross Bremen, CFA, Partner (Defined Contribution) and Sean Gill, CFA, CAIA, Partner (Alternative Assets)

NEPC Supports Principles for Responsible Investment

Principles for Responsible Investment

NEPC is proud to announce that we have become a signatory and partner with Principles for Responsible Investment initiative (PRI). The United Nations-supported Principles for Responsible Investment (PRI) Initiative is an international network of investors working together to put the six Principles for Responsible Investment into practice. Its goal is to understand the implications of sustainability for investors and support signatories to incorporate these issues into their investment decision making and ownership practices. The PRI Initiative has quickly become the leading global network for investors to publicly demonstrate their commitment to responsible investment, to collaborate and learn with their peers about the financial and investment implications of ESG issues, and to incorporate these factors into their investment decision making and ownership practices. For more information on PRI, please visit <u>http://www.unpri.org/</u>.

Note: Plan attribution calculations are returns based and the results shown reflect the composites shown. As a result, the total returns shown may vary from the calculated return shown on the performance summary.

The target return shown for each composite is a custom index, based on aggregated policy indices. This policy index weights the underlying policy indices of each option in the plan and the respective benchmark return. The allocation, selection, and intersection effects are calculated using the custom index described above along with the policy or target weight of each composite.

Reporting Methodology

- The client's custodian bank is NEPC's preferred data source unless otherwise directed. NEPC reconciles custodian data to manager data. If the custodian cannot provide accurate data, manager data may be used.
- Trailing time period returns are determined by geometrically linking the holding period returns, from the first full month after inception to the report date. Rates of Return are annualized when the time period is longer than a year. Performance is presented gross and/or net of fees as indicated on each page.
- For managers funded in the middle of a month, the "since inception" return will start with the first full month, although actual inception dates and cash flows are taken into account in all Composite calculations.
- This report may contain forward-looking statements that are based on NEPC's estimates, opinions and beliefs, but NEPC cannot guarantee that any plan will achieve its targeted return or meet other goals.

- Past performance is no guarantee of future results.
- All investments carry some level of risk. Diversification and other asset allocation techniques are not guaranteed to ensure profit or protect against losses.
- Some index returns displayed in this report or used in calculation of a policy, allocation or custom benchmark may not be available from the source or may be preliminary and subject to change.
- NEPC's source for portfolio pricing, calculation of accruals, and transaction information is the plan's custodial bank. Information on market indices and security characteristics is received from other sources external to NEPC. While NEPC has exercised reasonable professional care in preparing this report, we cannot guarantee the accuracy of all source information contained within.
- This report is provided as a management aid for the client's internal use only. Performance contained in this report does not constitute a recommendation by NEPC.
- This report may contain confidential or proprietary information and may not be copied or redistributed to any party not legally entitled to receive it.
